Tag for Halloween Wine Bag

Print the tags below on decorative (scrapbook) cardstock. Make sure the color of the cardstock is a light color and/or subtle design to allow the art to show clearly. When printing, make sure that your printer is set for actual size or 100%. The size of the tag should be 2" x 3".

Once the tags are printed, cut one of them out and punch the hole at the top of the tag. If desired, add color to the tag by adding ink to the edges. Simply slide an ink pad along the edges and/or lightly wipe it across the surface of the tag. I used dark brown and orange colors distress ink (regular ink pads also work for this) to add to the Halloween colors of the wine bag.

Put a bottle of wine in the gift bag. Thread a decorative cord through hole in the tag and wrap it around the neck of the bottle, tying it in the back.
